[www.iaa.com](http://www.iaa.com)  
609-924-6936

# Topics We'll Cover

---

- Key concepts, terminology and security
- The current marketplace
- Advantages of moving online to a fully Web-based system
- Questions about moving to a fully Web-based system
- How to select and migrate successfully
- Q&A

# Key Concepts, Technology and Security Impacting Foundation Information Systems

---

# Technology Trends Impacting Foundation Information Systems in 2014

- Web based portals with easier, differentiated, and personalized user interfaces (UI)
- Expanded use of online applications and online grantee reporting
- Migration to *hosted* cloud based systems
- No more open source grantmaking systems
- Quickly growing use of iPad tablets
- Growing use of iPhone and Android smartphones

# Technology Trends Impacting Foundation Information Systems

- More, faster and better broadband Internet access worldwide
- Increased telecommuting by senior management and program staff
- Quickly expanding multi-tenant cloud computing
- Multiple browser types and versions plus 32 and 64-bit Windows 7 and 8 makes system development, integration and support more difficult

Windows 7™

Windows 8

# Lasting Companies Know How to Re-invent Themselves

---

"Lasting companies know how to re-invent themselves."

*You've got to reinvent the company to do some other thing, like consumer products or devices.*

*"You've got to be like a butterfly and have a metamorphosis."*

Mike Markkula, right, Apple's first investor and father figure to Jobs.

Fired by Jobs in 1997 his parting advice called for re-invention.

Source: Mike Markkula – Apple's first investor

# Different Types of Foundation Services

1. All Microsoft Windows

2. All Microsoft Windows and accessible from inside a browser using remote access programs (e.g. *Windows Terminal Server, Citrix GoToMyPC or XenApp, or Windows Remote Desktop Connection*)

3. Hybrid Windows and Web browser

4. Fully Web browser

# Bring Your Own Device

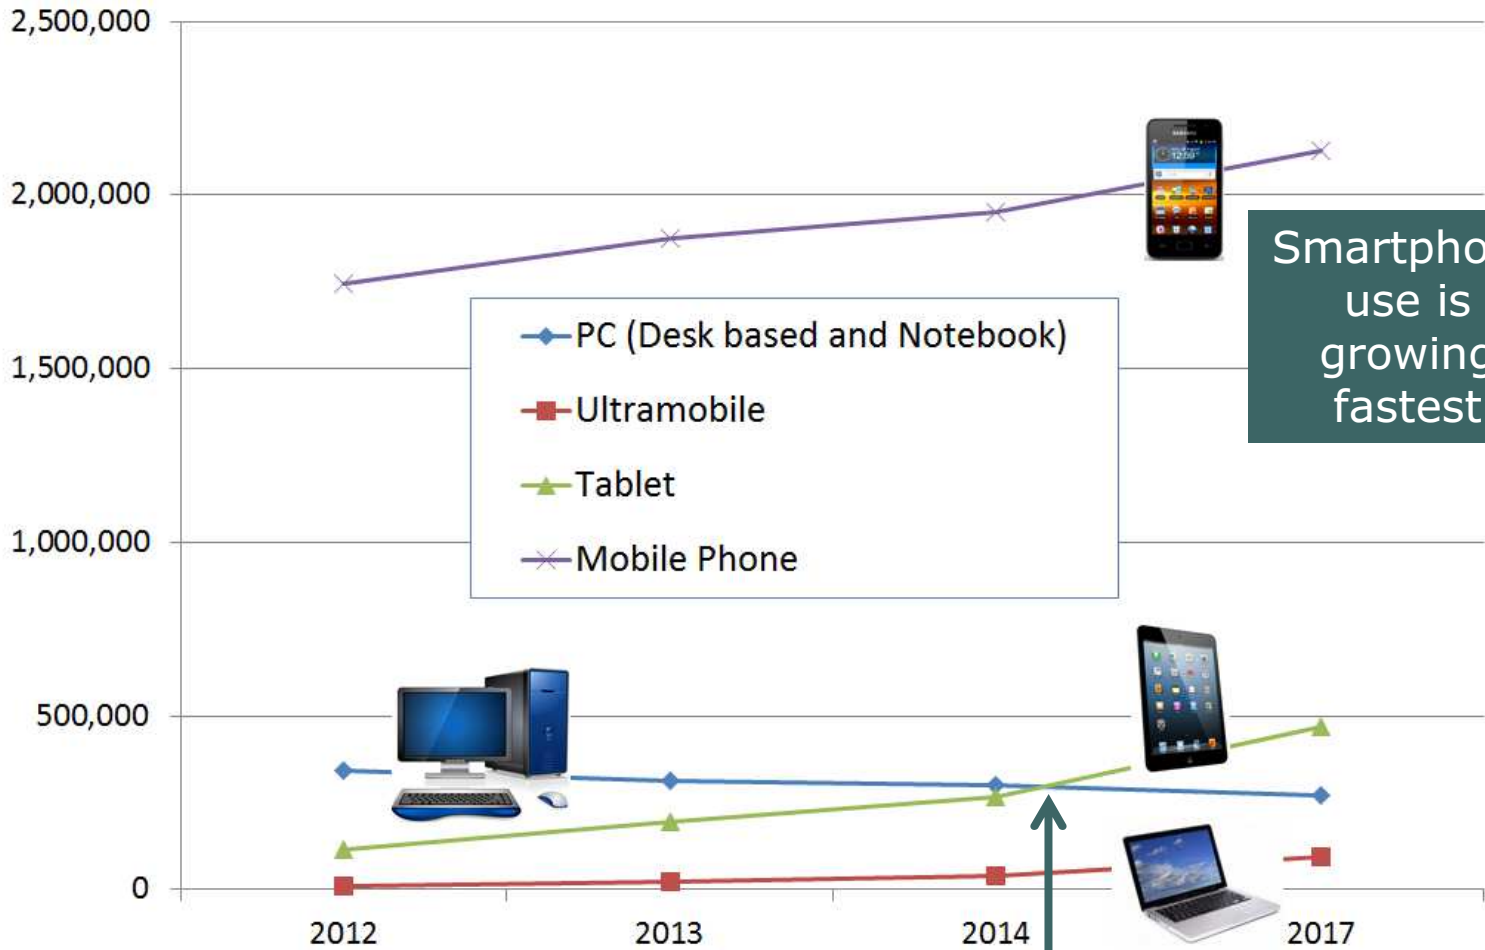

- Many foundations are now allowing staff to work on their own personal devices.
- "Microsoft rose to dominance in an age when the CIO (chief information officer) really held the keys to IT decision making. Over the past five years, BYOD has really eroded the level of control that many CIOs have."\*

# The Personal Computer Slowdown

Units sold worldwide

Smartphone use is growing fastest

Source: Gartner Group - December 2013

More tablets sold worldwide than desktop computers

# Location and Platform Differences

---

## Location

- In-house on your server(s)
- On remotely hosted servers

## Platform

- Practically all of the system provided by ONE vendor
- The core platform provided by one vendor plus the grants management system and utilities each provided by DIFFERENT vendors

# Is it all **ours** or is it **shared**?

---

## **All ours**

1. On a hosted server that is used ONLY by your organization
2. Your data always stored in YOUR OWN DATABASE

## **Shared**

1. On a hosted server that is SHARED by many organizations
2. Your data stored in a SHARED DATABASE (just as the bank does)

# Remote System Security

---

- **H**ypertext **T**ransfer **P**rotocol **S**ecure (**HTTPS**) is a widely used and a **MUST HAVE** communications protocol for secure communication over a computer network such as the Internet.

HTTP =  <http://www.gmnetwork.org/>

HTTPS =  [https://www.grantrequest.com/SID\\_1082/Default.asp?CT=CT&SA=AM&FID=&SESID=4236&RL=](https://www.grantrequest.com/SID_1082/Default.asp?CT=CT&SA=AM&FID=&SESID=4236&RL=)

- **A**uthenticated Single Sign On (**SSO**) restricts remote system access to computers from a specified location. It's used mostly by corporate grantmakers.

# Local Windows Applications vs. Hosted Web-based Applications

---

+

**Microsoft  
Outlook**

**OR**

Google docs

Google  
Mail

*"In a recent report, Gartner, the information technology research company, called Google "the only strong competitor" to Microsoft in cloud-based business productivity software . . ."*

## Grantmaking Software Priorities (n=255)

Growing fast →

← Major drivers

# The Hosted System Options

---

Today's  
systems

Basic system  
with limited  
flexibility

Highly  
customized  
one-of-a-kind  
system

Some of  
Today's  
Systems and  
Tomorrow's  
opportunity

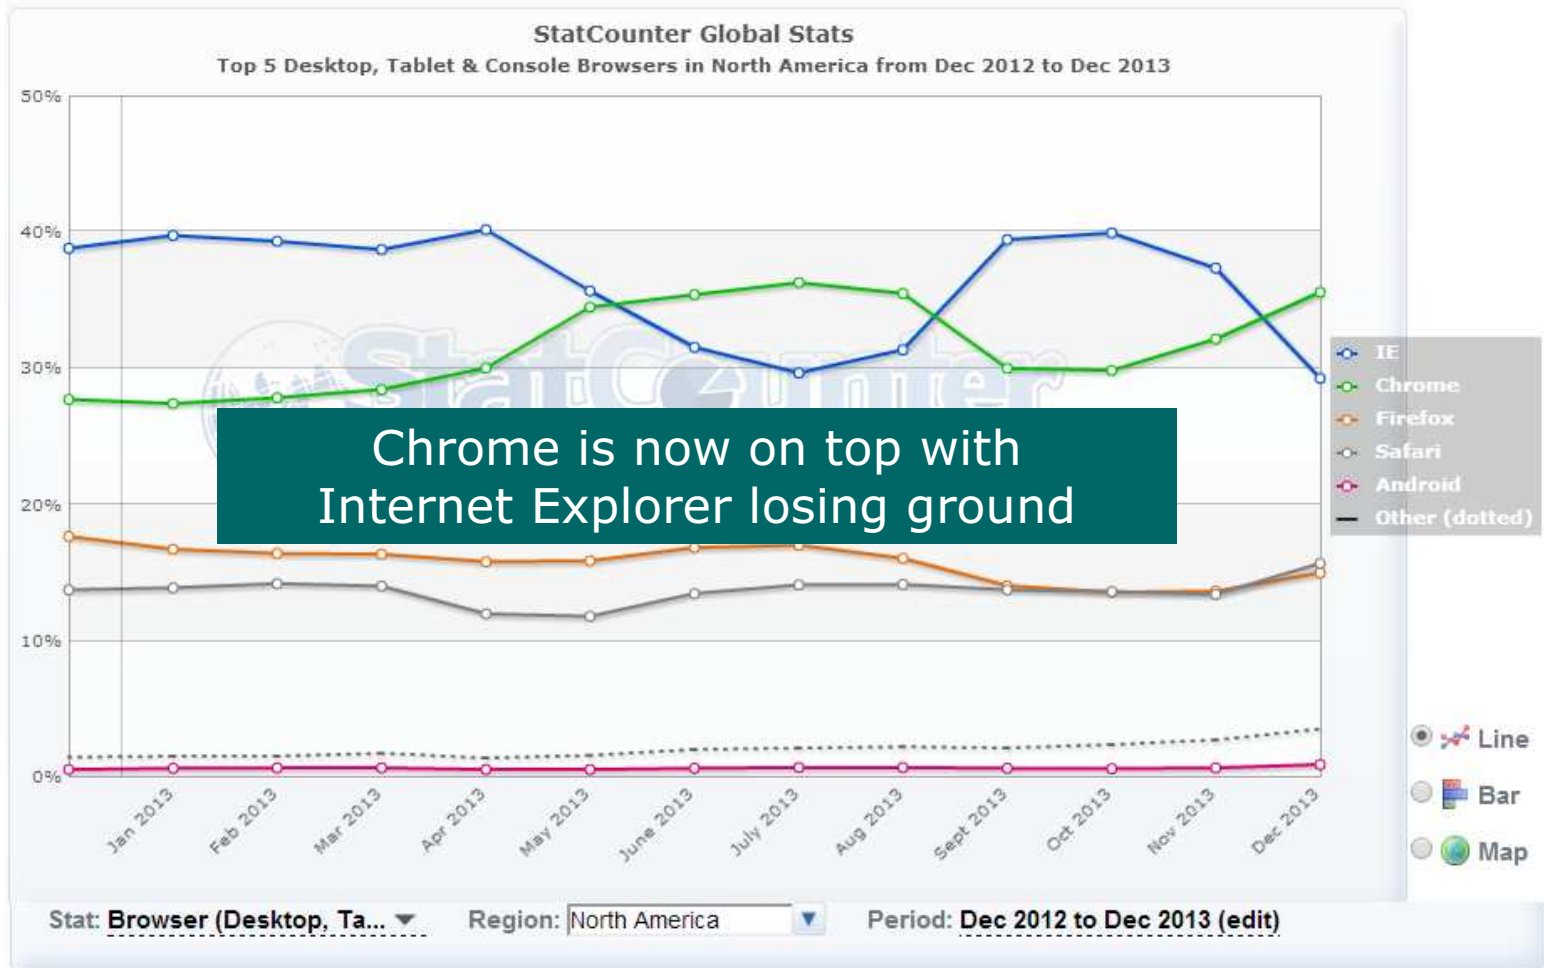

More flexible open personalized  
*(not customized)* fully Web-based  
systems that can be enhanced and  
linked to other applications and data

*Fully tested and supported*  
compatibility with all PC and Mac Web  
browsers worldwide is very Important

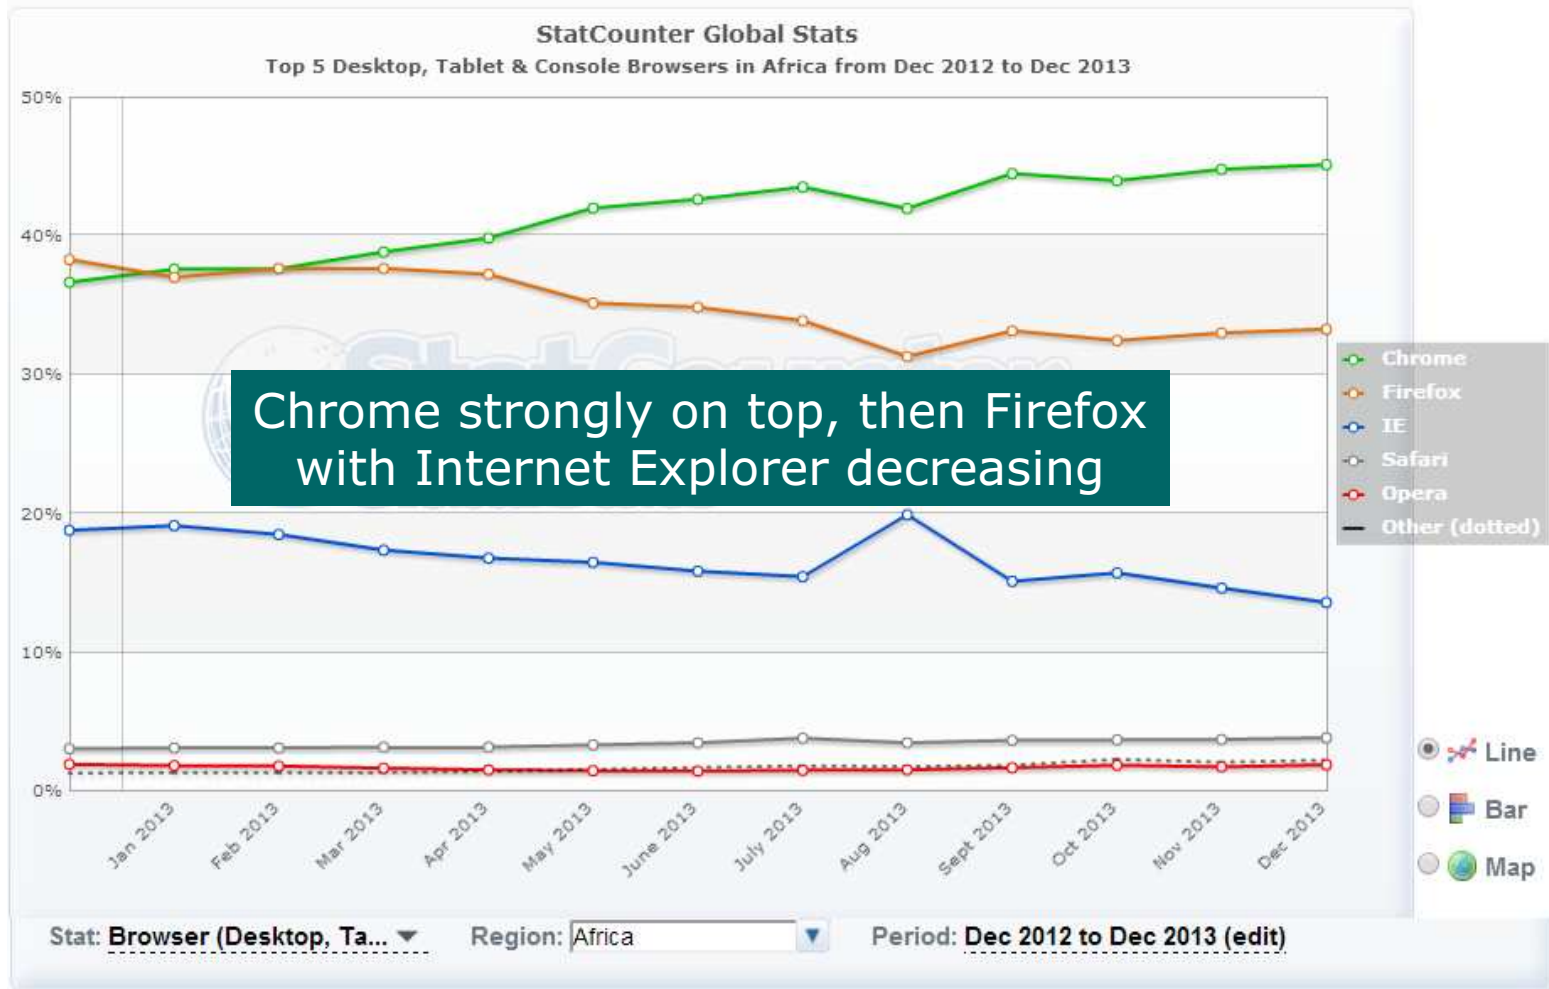

---

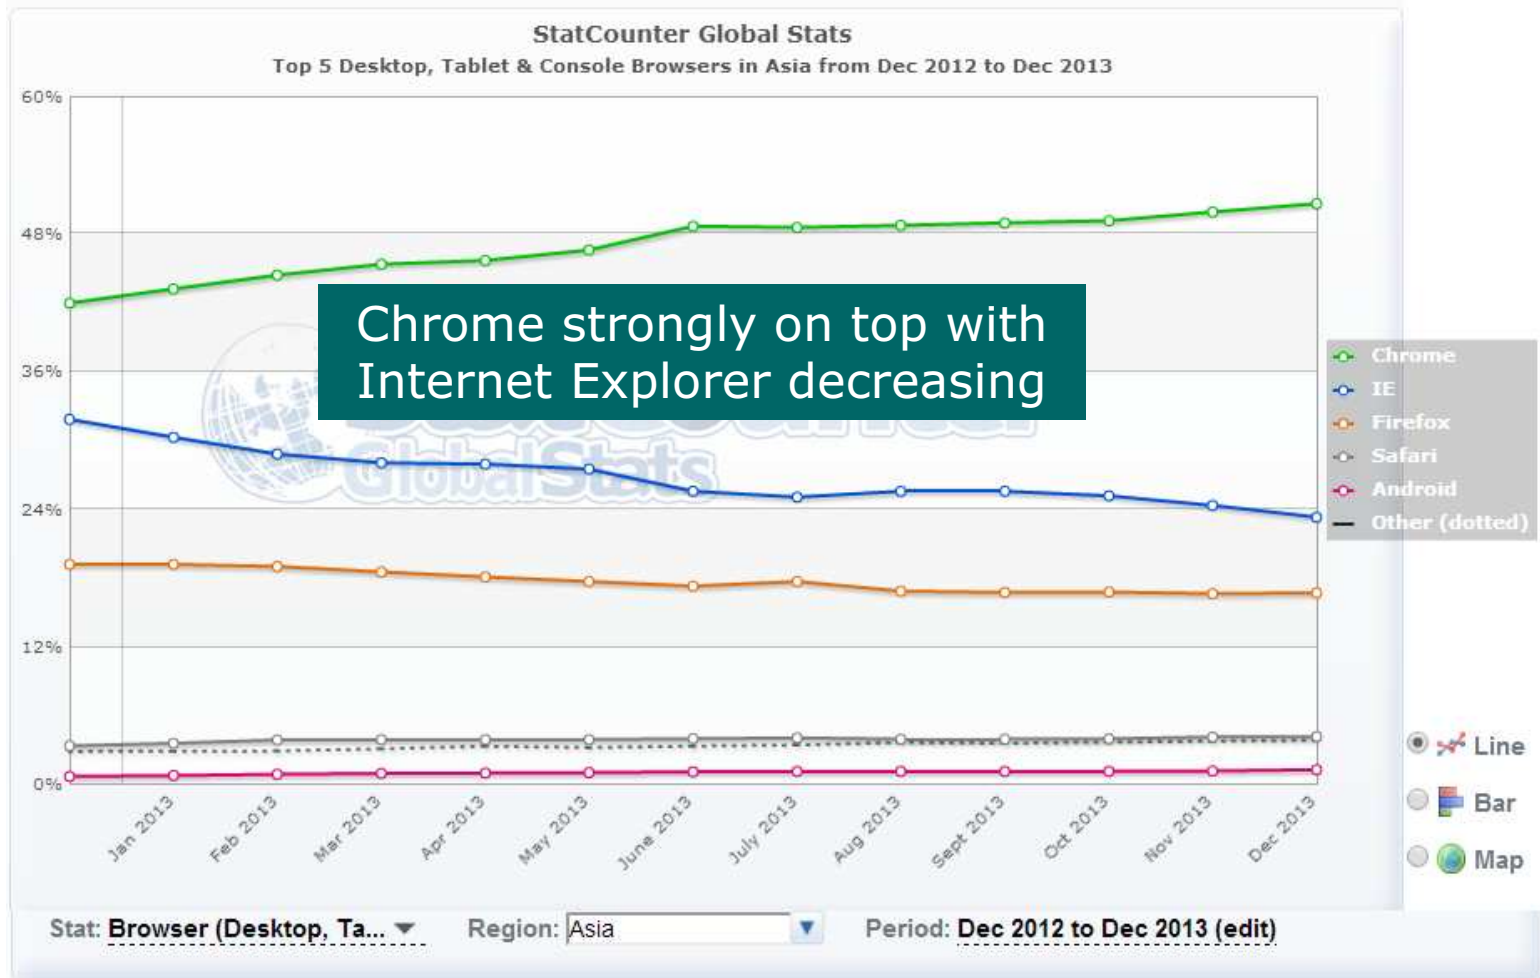

# Browser Use in North America

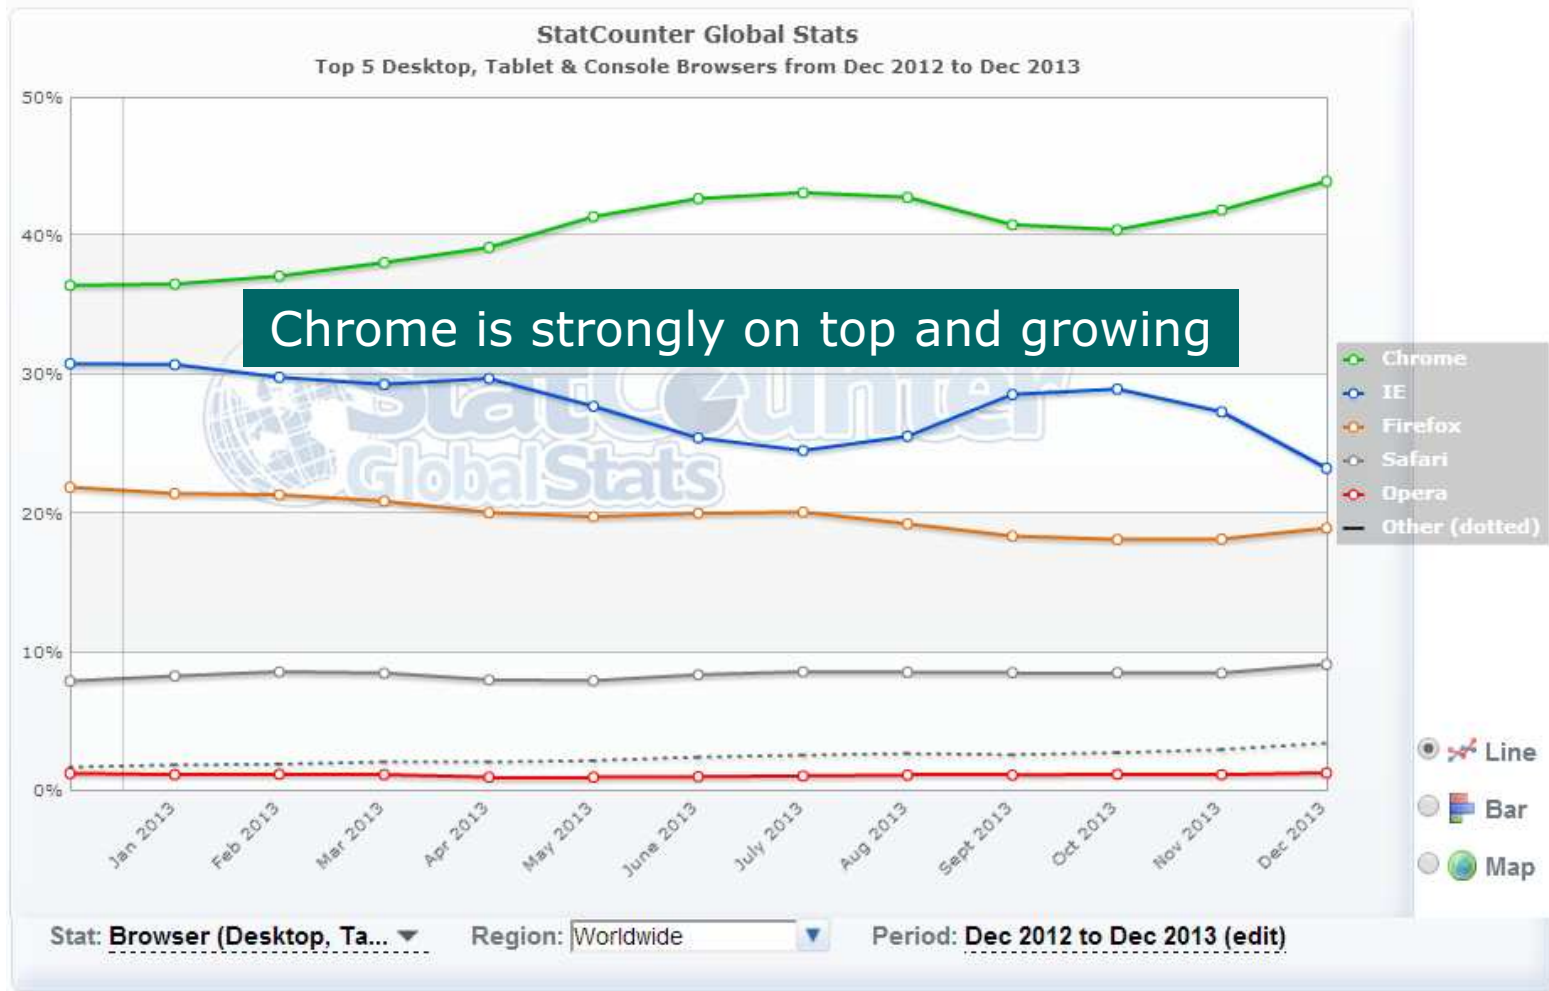

# Browser Use in Africa

# Browser Use in Asia

# Browser Use Worldwide

# Advantages of Moving Online to a Fully Hosted Web-based System

---

1. Overall system benefit and value to improve and streamline operations.
2. You only need a Web browser and Microsoft Office + Outlook installed locally.
3. The grants management service provider:
  - Maintains all of the server system hardware
  - Minor and major software fixes and upgrades
  - Ensures new and continuing links to local applications and online services
  - Backs up all of your grant data

# More **Advantages** of Moving Online to a Fully Hosted Web-based System

---

4. Service provider keeps enhancing the system based on the prioritized needs of their many clients.
5. Better integration with external systems and services.
6. Very easy remote access from anywhere.
7. *Somewhat* reduced need for in-house IT support.

Moving from one system to another is like changing the tires on a moving car

---

## Some **Key Things to Consider** When Moving Fully Online from Another System

---

1. No one-of-a-kind customizations, rather *personalized enhancements* to a core system for all of your foundation clients.
2. Inevitable differences (+&-) in functionality.
3. Data migration . . . many things may not carry over because of your variable codes, terminology, and data fields over time.
4. You need to provide enough staff, time and doing comprehensive system testing.

## Some **Key Things to Consider** When Moving Fully Online from Another System

---

5. Your not recognizing the need to change operations to use the new system well.
6. Problems resulting from internal and external staff turnover during migration, training and ongoing support.
7. Vendor's choice of solid future technologies and partners.
8. Good management and a successful business model that *can and will evolve.*

# Questions about Moving Online to a Fully Hosted Web-based System

---

1. Greater dependency on Internet access and the service provider(s) than ever before.
2. How many different service providers and products will you require to make and keep the whole system working?
3. Do they have a successful business model?
4. Does their staff really understand grantmaking operations, regulations and their system?

# Questions about Moving Online to a Fully Hosted Web-based System

---

5. Who tests ALL of the products to ensure that they all keep working after upgrades?

6. Data conversion FROM your current systems and also TO a FUTURE successor system.

7. Make sure your demo is of the standard system – not a costly customized version.

8. What functionality do you currently have that WON'T be in the hosted system? OK?

# Questions about Moving Online to a Fully Hosted Web-based System

9. Personalized Web portals for each user type with graphics and interactive dashboards?
10. Their ongoing major investment in R&D with regular releases?
11. Is the user interface the same across all key systems?
12. What links does it currently have to internal and external services? (e.g. GuideStar Charity Check, OFAC, NGOsource, accounting, EFT, social networking)

## EDs Completed or In Progress in 51 countries (as of 2/17/14)

Monday 3/17 3:30-5pm  
NGOsource/TechSoup  
Global: Share the  
Work. Reap the Benefit.

Egypt   Kenya   South Africa   Tunisia

*Note: New Countries in Italics.*

# Questions about Moving Online to a Fully Hosted Web-based System

---

13. Easy personalization?  
(*NOT costly customizations*)
14. Saving and naming favorite searches, views plus many standard reports?
15. Globalized multi-lingual (e.g. *Nicolás, René*) and multi-currency products?
16. Are the vendors using industry standard supported software and databases?

# Questions about Moving Online to a Fully Hosted Web-based System

---

17. Systems hosted in secure reliable enterprise class datacenter?
18. Is it designed and tested to handle a high volume and shared load of online applications and users?
19. How good is their communications and project management?
20. What is their track record of providing quality support services?

# Integration with External Systems and Services

- Browsers and Microsoft Office  
*(major types 32 and 64-bit versions of each)*
- Windows 7 and 8 *(32 and 64-bit versions)*
- GuideStar for Charity Check and Simplify
- OFAC list checking services
- Accounting systems *(type and version of each)*
- Electronic board and committee books
- iPads and other Android tablets
- Foundation Center eGrant and hGrant Reporting + free mapping service
- NGOsource *(via new API)*
- Document management
- Electronic Fund Transfer (EFT & ACH)
- Social networking services

# What to **See, Track and Rate** in Vendor Demos

---

1. Prioritized features that you **NEED** and are **MOST** important to YOU
2. Count the number of steps to do routine operations (e.g. download online applications with attachments)
3. Creating and using saved searches, views and reports
4. How integration with 3<sup>rd</sup> party services **REALLY** works
5. Permit vendor's to demo their wonderful distinguishing features

# Create and Use a System Demo Rating Worksheet

Vendor \_\_\_\_\_

## Demonstration Requirements

Proposal finalists will be invited to demonstrate the latest production version of their system during the week of February 2, 2009. We invite you to make this presentation in person (preferred) or via WebEx. This presentation will be attended by our decision-makers and Project Advisor.

It's very important to us that at the presentation we meet (either in person or via conference call) all of the individual team members who will be responsible for our particular account to include but not be limited to | our:

- Account / project manager who will be our single point of contact for our requirements specification, system implementation, customizations, installation and testing, training, upgrades, etc.
- Technical support specialist who will provide expert support for all post-implementation questions and resolving all of our reported problems

During the 2.5 hour demonstration would you please first demonstrate all of the following and then the many other powerful features of your system. If your system cannot currently do one or more of these capabilities then please explain this up front, skip it, and continue. Please feel free to reorder the sequence of the demo so that the flow works for you.

### Rating scale:

5 = Excellent - Does completely and easily

4 = Very good - Does completely but not easily (e.g. not intuitive, many steps)

3 = Good - Does in an acceptable way (possibly using a workaround)

2 = Poor - Does poorly

1 = Unacceptable - Cannot use as is

0 = No current capability

Capability	Rating	Comment
1. Demonstrate an online <u>branching eligibility quiz</u> with a <u>two-stage online application</u> (Mission Status Eligibility Application + full proposal) with attachments from a grantseeker's perspective - please show this in both English and Spanish (with marks and text such as ¡ ¸ á ñ Ó)		
2. Demonstrate how <u>online applications are created and modified</u> by the systems administrator.		
3. Demonstrate a <u>grantee portal</u> and how a grantseeker can: <ul style="list-style-type: none"> <li>- review the status of a pending request</li> <li>- update their contact information</li> <li>- see requirements due</li> </ul>		

# Ask the Service Provider to Use a Clear Rating Scale

## Integrated Grants Management System Requirements

IMPORTANT INSTRUCTIONS: Please describe your ability to meet each of our specified system requirements. Please do this by completing the Vendor Response column of this document. When doing this, please be very specific and describe your system's features and capabilities. Enter the number (1,2,3,4) associated with the bolded text in each box followed by additional explanatory information. Please also shade the Vendor Response box with the same color as shown below. See the SAMPLE ENTRY for an example.

- 1 Currently available and is fully functional exactly as described** in the latest production version of your product and/or service.
- 2 Similar but with some limitations** compared with what is described. Then clearly describe all limitations.
- 3 Not currently available** and, if shown as "Required" what you propose with a guaranteed delivery date and cost (if applicable) from the date of contract signing. Please clearly specify if your approach will be a customization, the integration of a 3rd party product, or other.
- 4 Targeted for future integration into the core system** exactly as we've described for all clients vs. being specific to us. Please specify the guaranteed delivery date.

# Compare Vendor *Described* System Capabilities Side-by Side

Integrated Grants Management System Requirements					
1	IMPORTANT INSTRUCTIONS: Please describe your ability to meet each of our specified system requirements. Please do this by completing the Vendor Response column of this
